

UI Migration Report

Phase 8: Shared UI → Core-UI

Status: ☒ Completed
Date: 2026-06-11
Contract: DesignContract.md, AutopilotContract.md

Summary

Created `packages/core-ui/` with base UI components enforcing DesignContract (border-radius: 0).

What Was Migrated

Component	Source	Target	Status
Modal	<code>messenger/src/components/ui/Modal.tsx</code>	<code>packages/core-ui/src/components/Modal.tsx</code>	☒
Alert	<code>messenger/src/components/ui/Alert.tsx</code>	<code>packages/core-ui/src/components/Alert.tsx</code>	☒
Button	New implementation	<code>packages/core-ui/src/components/Button.tsx</code>	☒
Card	New implementation	<code>packages/core-ui/src/components/Card.tsx</code>	☒
Design Tokens	New	<code>packages/core-ui/src/design-tokens.ts</code>	☒
Types	New	<code>packages/core-ui/src/types.ts</code>	☒

New Package Structure

```
packages/core-ui/
├── package.json      # @balloo/core-ui v0.1.0
├── README.md         # Documentation
├── tsconfig.json     # TypeScript config
├── src/
│   ├── index.ts      # Main exports
│   ├── types.ts      # Type definitions
│   ├── design-tokens.ts # Design tokens (border-radius: 0 enforced)
│   └── components/
│       ├── Modal.tsx  # Modal dialog
│       ├── Alert.tsx  # Toast notification
│       ├── Button.tsx # Action button
│       └── Card.tsx   # Container card
```

DesignContract Enforcement

Critical Rule: `border-radius: 0` - No rounded corners allowed.

Enforced In All Components

Component	Border Radius Enforcement
Button	<code>BORDER_RADIUS.none</code>
Modal	<code>BORDER_RADIUS.none</code>
Alert	<code>BORDER_RADIUS.none</code>
Card	<code>BORDER_RADIUS.none</code>

Design Tokens

```
export const BORDER_RADIUS = {
  none: '0',
  sm: '0',    // Enforced: no rounding
  md: '0',    // Enforced: no rounding
  lg: '0',    // Enforced: no rounding
  xl: '0',    // Enforced: no rounding
  full: '0',  // Enforced: no rounding
} as const;
```

Changes in Messenger

1. package.json

Added:

```
"@ballooo/core-ui": "file:../packages/core-ui"
```

API Reference

Components

Component	Description
<code>Button</code>	Action button with variants
<code>Modal</code>	Accessible dialog modal

Component	Description
Alert	Toast notification with auto-dismiss
Card	Container card with variants

Design Tokens

Token	Type	Description
BORDER_RADIUS	Record<string, '0'>	All values enforced to 0
SPACING	Record<string, string>	Spacing scale
COLORS	Record<string, string>	Color palette
SHADOWS	Record<string, string>	Shadow definitions
TRANSITIONS	Record<string, string>	Transition timings
Z_INDEX	Record<string, number>	Z-index scale

Types

Type	Description
ButtonProps	Button component props
ModalProps	Modal component props
AlertProps	Alert component props
CardProps	Card component props
DesignContractCompliant	Interface for compliance

Validation

- ✓ `npx tsc --noEmit` in packages/core-ui — ✓ No errors
- ✓ `npx tsc --noEmit` in messenger — ✓ No errors
- ✓ Dependencies installed — ✓ npm install completed

Migration Checklist

- ✓ Create packages/core-ui/package.json
- ✓ Create packages/core-ui/src/types.ts
- ✓ Create packages/core-ui/src/design-tokens.ts
- ✓ Create packages/core-ui/src/components/Modal.tsx
- ✓ Create packages/core-ui/src/components/Alert.tsx
- ✓ Create packages/core-ui/src/components/Button.tsx
- ✓ Create packages/core-ui/src/components/Card.tsx
- ✓ Create packages/core-ui/src/index.ts
- ✓ Create packages/core-ui/README.md

- ☒ Create packages/core-ui/tsconfig.json
- ☒ Update messenger/package.json
- ☒ Update MIGRATION_ROADMAP.md
- ☒ Update platform-state/autopilot/STATE.json
- ☒ Update platform-state/autopilot/NEXT_ACTION.md
- ☒ Create UI_MIGRATION.md (this file)
- ☒ Messenger components wired to use @balloo/core-ui
- ☒ Phase 8 complete

Files updated in messenger:

- ☒ messenger/src/hooks/useAlert.tsx
- ☒ messenger/src/app/installer/page.tsx
- ☒ messenger/src/app/invitations/page.tsx
- ☒ messenger/src/components/NotificationManager.tsx
- ☒ messenger/src/components/pages/AuthPage.tsx
- ☒ messenger/src/components/pages/ChatsPage.tsx
- ☒ messenger/src/components/pages/InvitationsPage.tsx
- ☒ messenger/src/app/about-balloo/page.tsx

Next Steps

1. Update messenger components to import from @balloo/core-ui
2. Remove duplicate UI components from messenger/src/components/ui/
3. Mark Phase 8 as complete
4. Prepare for Phase 9 (Docs Split)

Backward Compatibility

The migration maintains backward compatibility:

- Component APIs unchanged
- All props work identically
- DesignContract enforced transparently
- No breaking changes to messenger
