

TranslationContract

Purpose

This contract defines the translation system for the Balloo platform.

Source of Truth

- **Languages registry:** `packages/core-i18n/languages.json`
- **Current implementation:** `messenger/src/i18n/` (to be migrated)

Structure

```
packages/core-i18n/  
├── languages.json      # Languages list (source of truth)  
├── locales/  
│   ├── ru.ts  
│   ├── en.ts  
│   ├── hi.ts  
│   └── ...  
├── schema.json        # Schema for translations  
└── README.md
```

Must Rules

1. **Single Source:** `languages.json` is the authoritative language list
2. **Markdown-first:** Description of keys in markdown
3. **Machine-readable:** JSON schema for validation
4. **Fallback:** `en` for missing translations
5. **Default:** `ru` for the platform

Should Rules

- Admin UI should provide visual translation management
- Translation coverage statistics should be displayed

Machine-Binding Notes

Future machine-readable binding:

- `packages/core-i18n/schema.json` will validate translation files
- Build-time validation will ensure all 12 languages have translations

Version

- **Contract Version:** 1.0.0

- **Last Updated:** 2026-06-09
- **Status:** Active
