

Notifications Screen

Purpose

Push notification display and management — shows all incoming notifications from the messenger.

UI Elements

Element	Type	Required	Notes
Notification list	div.scrollable	Yes	Sorted by timestamp
Unread count	span.badge	Yes	Red circle with number
Mark as read	button	No	Single notification
Clear all	button	No	Clears all
Notification item	div.card	Yes	Icon + title + message + time

Actions

1. Mark as read

- POST to `/api/notifications/{id}/read`
- Removes red badge

2. Clear all

- POST to `/api/notifications/clear`
- Removes all notifications

3. Navigate to chat

- Clicking notification navigates to related chat
- Uses transition reference

Related Transitions

- `chat-to-notifications` — from chat screen
- `notifications-to-chat` — clicking notification

Related Scenarios

- `view-notifications-flow` — viewing notifications workflow
- `push-notification-flow` — push notification handling

Related Integrations

- `firebase-push` — receives push notifications from Firebase
