

Login to Chat

Overview

Transition from login screen to chat screen upon successful authentication.

Trigger

User submits login form with valid email and password.

Conditions

Condition	Type	Description
Email format	validation	Must be valid email format
Password match	authentication	Password must match stored bcrypt hash
Account status	business logic	Account must not be suspended
Email verified	security	User must have verified email

Result

- Session cookie set (httpOnly, secure)
- User profile loaded
- Redirect to </chat>
- Chat screen displays

Failure Modes

Failure	Response	User Action
Invalid credentials	Error toast "Invalid email or password"	Retry
Account suspended	Error page with contact info	Contact support
Email not verified	Prompt to resend verification email	Resend or login
Network error	"Connection failed" with retry button	Retry
