

Notifications to Chat

Overview

Transition from notifications screen to chat screen when user taps a notification.

Trigger

User clicks on a notification item in the notifications list.

Conditions

- Notification must reference a valid chat ID
- User must be authenticated

Result

- Chat screen opens
- Referenced conversation is selected and displayed
- Notification is marked as read

Failure Modes

Failure	Response	User Action
Chat not found	Error "Conversation not found"	Return to notifications
