USER VS TECHNICAL UI BOUNDARY

Версия: 1.0.0
Дата: 2026-06-13
Статус: Active — Canonical Source of Truth
Автор: Koda (NLP-Core-Team)

PURPOSE

Этот документ определяет **границы между пользовательским и техническим UI** в платформе Balloo.

Цель: Чёткое разделение компонентов и паттернов для client apps и technical nodes.

UI BOUNDARY MATRIX

Component Availability

Component	Client Apps	Technical Nodes	Admin Panel	Shared
Button	✓ Full	✓ Limited	✓ Full	✓
Input	✓ Full	✓ Limited	✓ Full	✓
Card	✓ Full	✓ Full	✓ Full	✓
Modal	✓ Full	⚠ Limited	✓ Full	⚠

Component	Client Apps	Technical Nodes	Admin Panel	Shared
Header	☑ Full	⚠ Minimal	☑ Full	⚠
Footer	☑ Full	✗ None	⚠ Minimal	✗
StatusBadge	⚠ Limited	☑ Full	☑ Full	⚠
MetricCard	✗ None	☑ Full	☑ Full	✗
LogViewer	✗ None	☑ Full	☑ Full	✗
NodeStatusBlock	✗ None	☑ Full	☑ Full	✗

Legend:

- ☑ Full — All variants available
- ⚠ Limited — Some variants only
- ✗ None — Not available
- Shared — Component definition shared

🎨 THEME POLICY

Theme Availability by Node Type

Node Type	dark	light	russia	Custom
Client (messenger, mobile)	☑	☑	☑	☑ Allowed
Technical (admin, workdocs)	☑	☑	✗	✗ Forbidden
Service (api, auth)	☑	✗	✗	✗ Forbidden
Infra (postgres, redis)	✗	✗	✗	✗ N/A

Theme Switcher

Node Type	Theme Switcher	Persist Preference
Client	☑ Yes	☑ Yes (localStorage)
Technical	☑ Yes	☑ Yes (localStorage)
Service	✗ No	✗ N/A
Infra	✗ No	✗ N/A

🏗️ LAYOUT PATTERNS

Client Apps (User Environment)

Pattern	Usage	Example
---------	-------	---------

Pattern	Usage	Example
Centered	Auth screens	Login, Register
Two-column	Chat, Mail	Messenger
Grid	Dashboard	Home screen
Sidebar	Settings	User preferences

Technical Nodes

Pattern	Usage	Example
Dashboard Grid	Monitoring	Node overview
Tabs	Node details	Overview/Logs/Config
Full-width	Log viewer	Real-time logs
Sidebar	Admin nav	Technical settings

SHARED VS NODE-SPECIFIC

Shared Components (packages/core-ui)

- Button
- Input
- Card
- Modal (base)
- StatusBadge (base)

Client-Specific (messenger/src/components)

- ChatMessage
- ConversationList
- UserAvatar
- MessageInput
- TypingIndicator

Technical-Specific (nodes/admin/components)

- MetricCard
- LogViewer
- NodeStatusBlock
- HealthWidget
- ConfigEditor

DESIGN INVARIANTS (Apply to ALL)

Universal Rules

Invariant	Client	Technical	Notes
border-radius: 0	☑	☑	No rounded corners anywhere
border: 2px solid	☑	☑	Default border width
System fonts	☑	☑	No custom font imports
44px touch targets	☑	⚠	Mobile only for client
3 themes max	☑	⚠	Technical: 2 themes

Client-Only Rules

Rule	Description
Custom themes allowed	Users can create custom themes
Full animation support	All animations enabled
Mobile responsive	Full mobile support required

Technical-Only Rules

Rule	Description
No custom themes	Only preset themes allowed
Minimal animations	Only essential animations
Desktop-first	Primary target is desktop

BOUNDARY CROSSING

When Client Needs Technical Components

Scenario: Client app shows node health status

Solution: Use shared `StatusBadge` component

```
// ☑ CORRECT: Use shared component
import { StatusBadge } from '@balloo/core-ui';

<StatusBadge status="healthy">Node OK</StatusBadge>
```

When Technical Needs Client Components

Scenario: Technical node has user settings

Solution: Use shared **Input**, **Button**, **Card** components

```
// ☒ CORRECT: Use shared components
import { Input, Button, Card } from '@balloo/core-ui';

<Card>
  <Input placeholder="Enter API key" />
  <Button>Save</Button>
</Card>
```

NODE CLASSIFICATION

Client Nodes

Node	UI Complexity	Themes	Components
messenger	High	3 + custom	Full client set
web-main	High	3 + custom	Full client set
mobile	High	3 + custom	Mobile-optimized
desktop	High	3 + custom	Desktop-optimized

Technical Nodes

Node	UI Complexity	Themes	Components
admin	Medium	2	Technical set
workdocs	Medium	2	Technical set
monitoring	Medium	2	Technical set

Service Nodes

Node	UI Complexity	Themes	Components
api	Minimal	1	Health endpoint only
auth	Minimal	1	Health endpoint only

CODEGEN RELEVANCE

For AI Code Generation

```
