

ThemeContract

Purpose

This contract defines the mandatory theme system for the Balloo platform, including platform preset themes and rules for custom themes.

Source of Truth

- **Platform preset themes:** `packages/core-theme/src/index.ts`
- **Current implementation:** `messenger/src/stores/settings-store.ts` (to be migrated)

Platform Preset Themes (Current Stage)

Exactly 3 preset themes are defined at the platform level:

1. `dark` - Dark theme
2. `light` - Light theme
3. `russia` - Russia flag theme

Must Rules

1. **Platform Presets:** All nodes **MUST** support the 3 platform preset themes
2. **Source of Truth:** `packages/core-theme` is the single source for preset themes
3. **Custom Themes:** Custom themes are **user-app-only**

Should Rules

- Custom themes should be saved only after 2 days of usage
- Custom themes should be available without registration

Must Not Rules

- **Must NOT create custom themes in admin/system nodes** (admin, api, docs-site, about, nodes-switcher)
- **Must NOT deviate from the 3 platform preset themes without separate contract**

Machine-Binding Notes

Future machine-readable binding:

- `packages/core-theme/src/index.ts` will export `PRESET_THEMES` with exactly 3 themes
- Build-time validation will enforce theme contract

Version

- **Contract Version:** 1.0.0
- **Last Updated:** 2026-06-09

- **Status:** Active
- **Total Presets:** 3 (dark, light, russia)
