

Docs Content

Platform documentation content (MDX files).

Structure

```
docs-content/  
├─ guides/           # User guides  
├─ api/              # API documentation  
├─ concepts/         # Architecture concepts  
└─ references/       # Technical references
```

Migration

Content from [docs/](#) is being organized into:

- [docs-content/](#) - MDX content
- [docs-site/](#) - Next.js documentation site
- [docs-contracts/](#) - API contracts
- [docs-migration/](#) - Migration guides

Files

Core Documentation

- [README.md](#) - Entry point
- [ARCHITECTURE.md](#) - System architecture
- [SPECIFICATION.md](#) - Product specification
- [TECH_STACK_AUDIT.md](#) - Tech stack overview

API Documentation

- [API_DOCUMENTATION.md](#) - API reference
- [MIGRATION_TO_EXTERNAL_API.md](#) - API migration guide

Project Documentation

- [PROJECT_SUMMARY.md](#) - Project overview
- [MONOREPO_DOCUMENTATION.md](#) - Monorepo structure
- [DEPLOYMENT.md](#) - Deployment guide

Migration Documentation

- [MIGRATION_GUIDE.md](#) - Migration steps
- [MIGRATION_SUMMARY.md](#) - Migration progress

See parent [docs/](#) directory for complete file list.

Rules

1. **Markdown-first:** All documentation in markdown
2. **Machine-readable:** JSON/YAML schemas accompany markdown
3. **Version control:** All docs versioned with git
