

Core Types

Purpose

Core type definitions for the Balloo platform.

Source

This package is the extraction target from [shared/](#).

Migration Status

- **Phase 3:** Migration from [shared/](#) to [packages/core-types/](#) - IN PROGRESS
- **Current:** [shared/](#) remains in place with backward compatibility
- **Legacy apps:** Still use [@balloo/shared](#) (imports not changed yet)

Types Extracted

- User types
- Chat types
- Message types
- Invitation types
- Notification types
- Feature types
- Page types
- Report types
- Auth types
- API response types
- Platform types
- Config types

Backward Compatibility

During migration, [shared/](#) re-exports from [core-types](#) to maintain compatibility:

```
// shared/src/index.ts (backward compat)
export * from '@balloo/core-types';
```

Rules

1. **Type-first:** Types define the contract
2. **No implementation:** This package contains only types
3. **Backward compat:** Keep compatibility with [shared/](#) during migration
4. **No breaking changes:** Add types, don't remove or modify existing signatures
