

# NODE DEPLOYMENT CONTRACT

---

**Версия:** 1.0.0

**Дата:** 2026-06-13

---

## ЦЕЛЬ

Определить правила развёртывания на узлах.

---

## DEV/STAGE/PROD

### Dev

- **Node:** laptop\_control, home\_aio
- **Initiated by:** Developer
- **Source:** Local branch
- **Isolation:** Complete

### Stage

- **Node:** home\_aio (primary), work\_server (isolated containers)
- **Initiated by:** Developer/CI
- **Source:** Pull request
- **Isolation:** Docker network

### Prod

- **Node:** work\_server ONLY
  - **Initiated by:** Control-plane (laptop\_control)
  - **Source:** Main branch + approval
  - **Isolation:** Production network
- 

## DEPLOYMENT FLOW

1. **Initiation:** laptop\_control запускает deployment
  2. **Validation:** home\_aio выполняет tests (optional)
  3. **Execution:** work\_server выполняет rollout
  4. **Verification:** Health checks + manual verification
- 

## SOURCE OF TRUTH

### Production Rollout:

- Source code: GitHub (main branch)
-

- Configuration: work\_server .env + home\_nas backup
- Database: PostgreSQL on work\_server
- Artifacts: home\_nas backup

### Separation:

- Messenger: Separate Docker network per environment
