

DesignContract

Purpose

This contract defines the mandatory design rules for all platform UI across the Balloo ecosystem.

Source of Truth

- `packages/core-brand` - Brand assets, logo, colors
- `packages/core-theme` - Theme system, preset themes
- `packages/core-ui` - Shared UI components

Must Rules

1. No Rounded Corners (Critical)

border-radius must be 0 everywhere across all platform UI.

- **rounded corners are forbidden everywhere**
- **Any `rounded*` utility classes are forbidden**
- **Circles via `border-radius: 50%` are forbidden**
- All containers, buttons, inputs, cards must have sharp corners (border-radius: 0)
- Legacy rounded usage in donor repository is a known migration defect
- Any found rounded corners must be treated as migration defects to be fixed

2. Visual Identity

- **Logo:** Must use the shared logo from `packages/core-brand`
- **Color Palette:** Must use colors defined in `packages/core-theme`
- **Typography:** Must use platform-wide typography settings

3. Theme System

Platform Preset Themes (Current Stage)

- `dark` - Dark theme
- `light` - Light theme
- `ruusia` - Russia flag theme

Custom Themes

- **Allowed only in user-facing apps:** web-main, mobile, desktop
- **Forbidden in admin/system nodes:** admin, api, infra without separate contract

Should Rules

- All components must support all preset themes

- All components must be available on all platform languages

Must Not Rules

- **Must NOT use any border-radius > 0**
- *Must NOT use rounded utility classes**
- **Must NOT use border-radius: 50% for circles**
- **Must NOT create custom themes in admin/system nodes**
- **Must NOT deviate from platform color palette**

Machine-Binding Notes

Future machine-readable binding:

- CSS variables from `packages/core-theme` must be enforced
- Linting rules will forbid border-radius > 0
- Build-time validation against this contract

Legacy Issues

Donor Repository Status:

The current donor repository contains legacy rounded corner usage in various UI components. These are known migration defects that must be identified and removed in Phase 12.

Audit Location: `workdocs/legacy-audit/ROUNDING_VIOLATIONS.md`

Version

- **Contract Version:** 2.0.0
- **Last Updated:** 2026-06-09
- **Status:** Active
