

NODE RECOVERY CONTRACT

Версия: 1.0.0

Дата: 2026-06-13

ЦЕЛЬ

Определить порядок и правила восстановления узлов.

RECOVERY PRIORITY

Tier 1 - CRITICAL:

1. laptop_control - восстановить access
2. work_server - восстановить production
3. home_nas - восстановить backups

Tier 2 - IMPORTANT:

4. phone_personal - восстановить 2FA
5. home_aio - восстановить dev

Tier 3 - OPTIONAL:

6. phone_service - восстановить admin
 7. phone_recovery_optional - восстановить emergency
-

RECOVERY SCENARIOS

Loss of storage-plane (home_aio + home_nas)

Impact: Dev workflow, backups

Recovery:

1. Восстановить home_nas из remote backup
2. Восстановить home_aio из git
3. Sync с work_server

Loss of work_server

Impact: Production DOWN

Recovery:

1. Provision new node
 2. Restore from home_nas backup
 3. Restore database from backup
 4. Update DNS if IP changed
-

5. Verify all services

Loss of laptop_control

Impact: Cannot manage system

Recovery:

1. New node
2. Restore SSH keys from password manager
3. Clone git repositories
4. Install CLI tools
5. Access other nodes via Tailscale

REQUIRED DOCUMENTS FOR RECOVERY

MUST have:

- NodeTreeContract.md
- NodeRecoveryContract.md (this file)
- docker-compose.yml
- database schema
- .env template
- SSH keys backup
- Recovery codes

Location:

- Primary: work_server
- Backup: home_nas
- Offsite: encrypted cloud storage
