

NODE_SUMMARY_home_aio

Canonical Name: home_aio

Aliases: home, aio, secondary-dev

1. NODE IDENTITY

- **Canonical Name:** home_aio
 - **Aliases:** home, aio, secondary-dev
 - **OS Target:** Linux (Ubuntu 22.04 LTS)
 - **Role Class:** dev-node
 - **Criticality:** LOW (для production), MEDIUM (для dev)
 - **Always-On:** NO
-

2. RESPONSIBILITIES

Main Functions:

- MAY быть secondary dev environment
- MAY запускать preview environments
- MAY выполнять secondary AI model inference
- MAY использоваться для local CI/validation

Project Bindings:

- **Balloo Messenger:** Dev/Staging

Services Expected:

- Docker + Docker Compose
 - Node.js (dev)
 - PostgreSQL (dev/staging only)
 - Preview environments
-

3. BOUNDARIES

MUST NEVER DO:

- MUST NOT быть production source of truth
- MUST NOT хранить production данные без бэкапа
- MUST NOT выполнять production workload

NOT AUTHORITATIVE FOR:

- Production data
-

- Production deployments
-

4. NETWORK & ACCESS

Private Access:

- Tailscale

Public Exposure:

- MAY (preview environments через tunnel)
-

5. DEPLOYMENT ROLE

- **Dev:** YES
 - **Stage:** YES
 - **Prod:** NO
 - **Can host previews:** YES
-

6. RECOVERY ROLE

- **Recovery Priority:** LOW
 - **What breaks if absent:** Dev workflow замедляется
 - **Recovery Method:** Восстановление из git + sync с work_server
-

7-8. SOURCES & RECREATION

- Sync с work_server repositories
 - Install Docker, Node.js
 - Configure Tailscale
 - Optional for production
-
